

MICHAEL DROSTE-LAUX®

ALKALINE DETOX BATH MEDICINAL PRODUCT FOR ACID PURIFICATION BY OSMOSIS

Take your time for this alkaline detox bath and feel how incomparably supple your skin can become. Bathe longer than usual to give the natural excretion function time to work and take full effect over your skin.

Alkaline Detox Bath

- causes an alkaline pH value of the bath water of pH 8.5 to pH 9.0
- the alkaline value is the same as in the amniotic fluid of an expectant mother
- supports the excretion of acids and metabolic waste products through the skin
- supports the self regulation of the skin
- leaves your skin soft and supple
- regenerates after sport and stress
- does not contain animal substances, artificial colours or fragrances
- does not contain mineral oil derivatives, silicone or tensides

The Michael Droste-Laux alkaline detox bath is suitable for every skin type and all ages. Also very suitable for baby and kids care.

ALKALINE DETOX BATH

MEDICINAL PRODUCT

FOR ACID PURIFICATION BY OSMOSIS

Health, beauty and vitality are very closely linked to the nutrition and to the body's acid-alkaline balance. Modern foods, beverages and tobacco, lack of exercise, environmental pollutants and stress are substantial contributors of acidity. The body deposits excess acidity in the connective tissue. These deposits of so-called "waste products" then prevent the cells from receiving an adequate supply of nutrients and oxygen. If the skin can no longer perform its function as an excretory organ, this has a damaging effect on the entire organism.

The Michael Droste-Laux Alkaline Detox Bath readopts the ancient tradition of alkaline body care.

The bath water with a pH value of 8.5 and the premium quality formulation assist the excretion of acids and metabolic waste through the skin.

Michael Droste-Laux Alkaline Detox Bath stands for cleanliness, freshness, moisturising, softness and radiance. Your skin will be left silky smooth with a light and pleasant scent. Treat yourself to a relaxing and purifying bath with high value ingredients such as the three natural gemstones aquamarine, rock crystal & rose quartz.

The Versatile Uses And Effects of the Alkaline Detox Bath

ACCOMPANYING THERAPY FOR NEURODERMATITIS, PSORIASIS, FUNGAL SKIN AND NAIL INFECTIONS. SUCCESSFUL AGAINST CELLULITE, SORE OR HARDENED MUSCLES, FOOT PERSPIRATION OR HYPERSENSITIVITIES.

Applications

FULL-SIZE DETOX BATH

Use 3 tablespoons for a full-size bath. Bath temperature 36 to 37.5° C, bathing time 30 to 90 minutes. Recommended are 1 to 2 baths per week. Maximum detox effect, since the whole skin surface is used for acid excretion. Increase this effect by softly brushing your skin every 15 minutes during the bath.

ALKALINE FOOT BATH

1 tablespoon for a foot bath. Pampers your feet and has positive effects on your health. A warm foot bath in winter relaxes and supports a sound sleep. In summer, a cool foot bath is refreshing and invigorating. Relieves swellings, heavy legs, pains, foot perspiration, reduces callus. Take 2-3 foot baths per week, duration 30-60 minutes.

ALKALINE BODY PEELING

An alkaline body peeling in the morning is refreshing and invigorating. Shower, then moisten a bit of alkaline bath salt in your hands and gently massage it on your wet skin (leave off your face). Shower off with warm water.

ALKALINE MASSAGE

Treat yourself to an invigorating body massage with alkaline bath salt mixed with olive or sesame oil. Supports the excretion of waste products.

ALKALINE APPLICATION FOR THE SAUNA

An insider's tip is the alkaline salt application between sauna sessions. Mix 1 tablespoon of acacia or forest honey with 1 tablespoon of alkaline bath salt and a bit of water. After the first sauna session, apply the honey-salt paste on your skin, shower it off and rest a while before the next sauna session.

ALKALINE BODY WRAPS

The classic body wrap undergoes a renaissance. Soak linen or cotton rags in 2-3 liters of hot water with one tablespoon of alkaline bath salt for about 3 minutes. Wring them out and place them on/wrap around problem zones (e.g. joints). Cover with dry rags and rest for 1-2 hours, or leave on overnight.

ALKALINE WASH SOLUTION

Mix one teaspoon of alkaline bath salt with 1 liter of warm water. Wash face and body with this soft alkaline solution. Eminently suitable for very sensitive skin.

ALKALINE FACE MASK

Soak a clean cloth in a solution of ¼ liter warm water and ½ teaspoon of alkaline bath salt, wring out and place on your face for about 20 minutes. Very refreshing and helpful in treating acne.
